

For Immediate Release:

Conco Industrial Services Opens New Office in Gonzales, Louisiana

Gonzales, Louisiana (September 2nd, 2014) Jason Wilburn, Vice President of Conco Industrial Services (CIS), is pleased to announce the opening of a new CIS office and operations facility located at 2930 South Ruby Ave. in Gonzales, Louisiana. CIS opened the new location to better serve its current customers and grow its business in the area.

Wilburn said, "The petrochemical industry is expected to have substantial growth in the next 10 years, and we want to grow along with the industry to meet the needs of our customers."

Conco is the only company utilizing the TruFit™ Tube Cleaning System; an exclusive technology that incorporates mechanical tube cleaners sized exactly to the internal diameter of the tube. Using safe, low pressure water (300 psi), the TruFit™ tube cleaners are "shot" through the tubes leaving an exceptionally clean, ideal surface for improved heat transfer.

CIS offers petrochemical customers advanced technology-based cleaning and certified nondestructive testing services. These uniquely integrated services provide customers with "absolutely the best" method for maintaining their heat exchangers and other industrial equipment while minimizing downtime. With safety as a first priority, CIS delivers fast, effective cleaning, with a smaller footprint and less personnel. For more information about CIS, please visit <http://www.concosystems.com>.
