**CONCO LAUNCHES “PIT STOP” CAMPAIGN TO KEEP POWER PLANTS  
EFFICIENT AND RELIABLE THROUGHOUT PEAK SUMMER MONTHS.**

*Conco Says “Give Us Two or Three Days, We’ll Give You Two or Three Megawatts”*

**PITTSBURGH — May 01, 2010** — Conco Systems today announced a new “Pit Stop” campaign running from June through August, 2010, to keep power plants operating efficiently and reliably during the summer months of peak demand. Similar to a NASCAR® Pit Stop, Conco is helping power plants quickly recover lost megawatts, improve plant heat rate and reduce CO<sub>2</sub> emissions over a brief two or three day period with their exclusive Total Condenser Performance™ services. The campaign, which targets a period of time when most power plants don’t do maintenance, highlights how a short “Pit Stop” approach to condenser maintenance, can dramatically improve performance throughout this period. Conco is even throwing in two tickets to the NASCAR® Ford 400 Sprint Cup Championship in November for every condenser cleaning performed during the campaign. Customers only need to visit the campaign website at [www.YourConcoPitCrew.com](http://www.YourConcoPitCrew.com) to request the service to be eligible.

**About Conco Systems**

Founded in 1923, Conco is the world’s leading provider of condenser and heat exchanger services to the power generation industry with offices located in the US, Europe and Asia Pacific.
